Sea is a leading software firm in the maritime industry providing smart solutions to freight shipping and everything in between

- Provide frontend support and expertise for new projects
- Coach fellow developers
- Contributing code across the stack on the Next frontend along with C# backend
- Work closely with design and product to realise requirements

Impala Travel, UK Senior Developer (Frontend Focused)

REACT TYPESCRIPT NEXTJS CYPRESS
NESTJS NODEJS VERCEL

SEPT 2022 - JAN 2023

Impala is a travel tech company looking to build the future of travel with wide ranging integrations and no code solutions.

- Lead Frontend development
- Coach fellow developers
- Contributing code across the stack to produce features end to end as part of a team
- Enhancing code quality and setting coding standard for the frontend
- Work with Design and Product on Frontend features
- Deliver highly tested clean code

Chinsay AB, SG. Technical Lead

MAY 2021 - SEPT 2022

C# .NET CORE TYPESCRIPT
VUEJS AZURE

Chinsay AB, SG. Full Stack Developer

MAY 2020 - MAY 2021

Chinsay is a freight digitisation and contracting platform.

- Organise and lead the customer experience team
- Coach fellow developers
- Contributing code across the stack to produce features end to end as part of a team

Hooq SG, Frontend Developer

OCT 2018 - MAY 2020

REACT REDUX NODE TYPESCRIPT AWS

Hooq was a media streaming platform based in Singapore. Served primarily on AWS I worked with a team on the web frontend using React and proxied via a Koa server using Redis for caching

- Producing high quality reusable components
- Working with the team to produce high quality solutions whilst providing the best customer experience
- Work closely with other teams to produce well considered integrated solutions that scale with the customer demand

Loi Hein SG, Full Stack Developer

OCT 2016 - SEPT 2018

ANGULAR VUE C# ENTITY
FRAMEWORK

Loi Hein is a consumer goods company that produces, markets and sells fast moving consumer goods. My role was to work improving internal systems, migrating and updating

- Create functional and secure APIs using the .Net Core framework
- Revamp the internal systems to use modern design in Angular and Vue

GROWTH GOAL AND AMBITION

I greatly enjoy working with the frontend and great people. I hope to keep learning and growing from great people around myself along with growing more to lead more teams. I have greatly enjoyed my experience creating strong well functioning teams and look to grow my leadership and management abilities moving forward looking to move into Engineering management.

I view myself as a people first manager who believes a well functioning team is paramount to project and business success. I am looking for an environment to build my abilities and grow into management overtime.

SKILLS

JavaScript	ReactJS	Redux	NodeJS
CSS/ SCSS	C#	SQL Server/ MySQL	Agile/ Scrum
NextJS	TypeScript	Cypress	TDD
Jest	RESTful APIs	NestJS	Docker
